# (Sells of Video game analyses)

The fact of Spread of video game it's not hiding from everyone now, the computation between the publisher that responsible of improve the gams is so increase also they have to satisfaction the audience in different platform .

So in the data sit I try to see the line of increase the sells between multiple country's at years .

In first look when I use the visualization between the feature trying understand the different between the total sells in each country:

incrse the vedeo games by Year
